

NetworkIP Services Overview

Transaction Services & Point of Sale Activation

Switch to Prepaid's Best Platform — superior technology, flexibility, quality and controls.

NetworkIP's Transaction Services division is designed to meet the industry demand to electronically deliver not only prepaid long distance, but a variety of other stored value products and services to retail. Through various transaction processing methods, we are able to help our customers design develop and implement the right strategy that will allow them to remain in control of existing business, close new opportunities and ultimately increase revenues.

Terminal & PC Solution

Commonly referred to as POSA, NetworkIP delivers a turn-key white label solution that supports and manages the complexities of a fully developed POSA program. This terminal & PC-based solution allows our customer to stay focused on their core competency of selling phone cards (or prepaid products) while we do the "heavy-lifting" behind the scenes.

Through our patented iQT® technology, we ensure the best in call monitoring, call quality and call termination — at no additional cost.

Turn-Key POSA Solution

- Management of Processing Platform
- Terminal Sourcing
- Terminal Software Management
- Product Category Management
- Funding of Products & Services Inventory
- Reporting & Billing Systems
- Money Collections & Disbursements
- Merchandising Materials

NetworkIP Services Overview

Transaction Services & Point of Sale Activation

Host-to-Host Connection Services:

NetworkIP's host-to-host connection services provide valuable real-time connections between our platform and large multi-lane retail environments in addition to providing links for third party processing opportunities. Our in-house team of developers and project management experts consult with our distributors and their customers to ensure that the processing software and product integration objectives are met and delivered on time.

Third Party Transaction Services Support:

In today's market, NetworkIP believes it is crucial for our customers to have a well thought out POSA strategy for their business. In situations where there is already a third party POSA provider, NetworkIP is interested and supportive of that choice. We will consult with the company you have chosen by providing support services surrounding necessary product and connectivity information to ensure the success of your POSA program.
